KU Leuven Supplementary Information

- **Academic Requirements**
  Requirements for student performance and grading methods can be found on Leuven’s exchange website along with information about the exam schedule and the exam system. KU Leuven uses a grading scale from 0 (minimum) to 20 (maximum).

  A list of courses available to exchange students for the upcoming academic year will be updated as they become finalized.

- **Services for Students with Disabilities**
  The Service for Students with Disabilities supports students with disabilities who are studying at Leuven. This office assists students who have (clinically) documented impairments that limit their ability to participate in academic activities. The Service assesses eligibility for accommodations relating to instructional settings and exams. Every student has to follow the same procedure before having access to accommodations.

- **Housing**
  Information about different types of housing available for international students is available online on Leuven’s Accommodation website.

  Assistance with all student housing issues is provided by the University Housing Service. Leuven also provides students with a rough average of a monthly/yearly budget in Leuven.

- **Contact Information**
  Elke Timmermans
