About the Children and Family Justice Center (CFJC)
Founded in 1992, the Children and Family Justice Center (CFJC) is a comprehensive children's law office and part of the Bluhm Legal Clinic at Northwestern University Pritzker School of Law. At the CFJC, attorneys and law students work together to promote justice for children, adolescents, and their families through direct legal representation, policy advocacy and law reform. Website: http://www.law.northwestern.edu/legalclinic/cfjc/
REHABILITATIVE RELEASE OF
YOUTH FROM ILLINOIS PRISONS

Removing bureaucratic barriers to youth reentry success

Illinois currently operates an outmoded and inefficient system for releasing delinquent youth from state juvenile incarceration to community supervision. Unlike Illinois juvenile courts and even juvenile prisons, the state’s system for discharging youth from incarceration is part of a state agency that deals primarily with adult offenders.

Illinois is out of step with the rest of the nation and with what juvenile justice experts and research have determined are best practices for successfully transitioning youth from prison back to home communities.

To advance public safety by correcting this failing and improving opportunities for youth to have successful lives, Illinois should remove responsibility for youth prison release decisions from the Illinois Prisoner Review Board. Instead, the Illinois Department of Juvenile Justice should be empowered to make the decisions using timely, responsible release procedures supported by due process protections.

BACKGROUND

The State of Illinois is responsible for release, community supervision (“aftercare”), and discharge of youth who have been adjudicated delinquent and committed by a court to the custody of the Illinois Department of Juvenile Justice (IDJJ). Although youth entering and exiting state incarceration represent only a small proportion of youth in the juvenile justice system, their successful reintegration is crucial to public safety and success in life.

Upon the creation of the Illinois Department of Juvenile Justice in 2006, adult parole agents from the Illinois Department of Corrections (IDOC) continued to supervise all youth in community settings and the Illinois Prisoner Review Board (IPRB) continued to oversee release and revocation decisions. The youth reentry system remained virtually indistinguishable from adult parole. At the same time, splitting management of particular aspects of youth reentry across three state agencies – IDJJ, IDOC and IPRB – allowed for diffusion of responsibility.

The Youth Reentry and Improvement Law of 2009 directed the Illinois Juvenile Justice Commission to conduct a comprehensive audit of youth parole reentry
Rehabilitative Release

and revocation. The study was conducted to give policymakers a better understanding of system flaws leading to high recidivism rates.1

Published in 2011, the Commission’s Youth Reentry Improvement Report explained the research and conclusions made after observation of 237 IPRB hearings and after review of 386 youth IDJJ files. The report stated: “An essential measurement of any juvenile ‘reentry’ system is whether youth returning from incarceration remain safely and successfully within their communities. By this fundamental measure, Illinois is failing.”2

The report traced the way in which the system was “functionally identical to the adult system and modeled on adult culpability and capability,” recommending significant changes to achieve more developmentally-appropriate methods of release and supervision.3

A great deal has changed since the Commission’s 2011 report: youth are no longer supervised by adult parole agents; youth are no longer unaided in locating treatment services in the community; and youth are no longer unrepresented by legal counsel at revocation hearings.

However, one decision point discussed at length – the process of transitioning youth back home – is a procedural relic of adult parole. In 2011, Commissioners identified the release process as “an ineffective mechanism” for making decisions in the best interest of youth and the community, involving the use of an “idiosyncratic set of criteria” to determine whether a youth ought to be released, resulting in “arbitrary decisions” that protect neither youth nor public safety.4

Similar issues continue today. Although the nature and quality of IDJJ assessment, clinical recommendations, and aftercare planning have improved, the IPRB overrules IDJJ release decisions even more frequently than during the Commission’s original observations.

Consolidating release authority within IDJJ, as is the national practice, will enable continued improvements in system accountability, public safety, efficiency, and due process.

Consolidating release authority within IDJJ, as is the national practice, will enable continued improvements in system accountability, public safety, efficiency, and due process.
Illinois is the only state where juvenile release decisions are made by a state board dedicated primarily to decisions about adult prisoners.

In addition to performing juvenile hearings, the IPRB determines parole for adult prisoners serving indeterminate sentences (issued prior to 1978) and sets mandatory release conditions for adults serving the currently-used determinate sentences. Juvenile hearings represent less than seven percent of the caseload of the IPRB.5

Illinois is the only state in the country that gives an adult-focused parole board the power to release youth.6 The other 49 states, representing 95 percent of national commitments to state secure confinement,7 use other mechanisms:

Direct release by the department that supervises youth is by far the most common release mechanism, available to over two-thirds of youth incarcerated in state facilities nationwide. Department release is also the mechanism used in all of the six states that commit youth in similar or greater numbers than Illinois. Juvenile court and juvenile parole boards are exclusively found in states with smaller systems.\(^{10}\)
Illinois’ current release decision process undermines the rehabilitative purpose of the juvenile justice system by obstructing youth and system accountability.

The Illinois Juvenile Justice Commission report determined that the release decision-making process was inconsistent with the rehabilitative purpose of the juvenile justice system. According to the Commission, “successful youth outcomes depend upon three key aspects of release: release timing, release processes, and release conditions.”13 The Commission noted deficiencies in each of these three aspects of release. Though many of the Youth Reentry Improvement Report’s recommendations have been advanced over the last five years (timely review and presentation for release by IDJJ, statewide expansion of the agency’s aftercare pilot, and increased due process at parole revocation hearings), the IPRB release process remains an adult model. In fact, the rate at which the IPRB upholds Illinois Department of Juvenile Justice release decisions has declined since the Commission’s 2011 report (from 96% in 2010-2011 to 85% in 2013-2014).14

The Commission explained that “[q]uality release decision procedures not only promote fundamental fairness, but are critical to youth success at reentry. Fair, legitimate decision-making processes increase youth compliance with institutional rules and release conditions, while poorly-explained and seemingly arbitrary processes undermine compliance. Decisions lacking transparency and consistency also thwart oversight of the agency preparing youth for reentry (e.g. IDJJ) and hinder internal quality control of the body of hearing officers (e.g. IPRB).”15

The lack of transparency and consistency in the IPRB release hearing process remains an obstacle to youth and IDJJ accountability. IDJJ’s release processing has improved somewhat since the agency has taken over aftercare. The agency has abandoned certain IDOC administrative practices that caused delays in approving home addresses, such as uniformly applying adult residency restrictions to youth. But when there is no assurance that the IPRB will adopt IDJJ’s recommendations, it is difficult to hold IDJJ responsible for developing and abiding by appropriate rehabilitation benchmarks and timelines, arranging timely access to community programming, or securing appropriate release placements for youth.

The uncertainty of whether and when youth will join programming, housing, or treatment caseloads can damage relationships with service providers. It can also create a compounding chain of delay, as some programs will not hold space for a youth who is not guaranteed a release date, while some IPRB members hesitate to approve youth release without specific arranged services in place.

Even small release delays can jeopardize carefully-constructed housing arrangements, community services, and treatment space, while eroding youth and family perceptions of system legitimacy.

Youth institutional behavior and active engagement in programming can be incentivized by the certainty of release upon meeting all obligations. Families and youth need to be able to count down toward reunification and prepare accordingly. In assessing the need for increased IDJJ authority to approve placements for youth about to be released, facility monitors at the John Howard Association of Illinois noted that delays in release create “a real danger of youths becoming frustrated and regressing.”

Finally, even when the IPRB does not deny release, the mechanics of the hearings present significant administrative challenges to both IDJJ and IPRB, resulting in cumulative delays that cause expense and frustration for the state, youth, families, and service providers. The IPRB ordinarily conducts release hearings once or twice per month at each of the six IDJJ prisons, but there is no legal requirement that the IPRB conduct release hearings more frequently than once a year. It is not uncommon for youth who are ready for release to spend several weeks awaiting a hearing. In 2014, the IPRB granted continuances rather than taking final action in 13 percent of its juvenile cases.
Even small release delays can jeopardize carefully-constructed housing arrangements, community services, and treatment space, while eroding youth and family perceptions of system legitimacy. These delays are expensive and can also be expected to increase noncompliance.

UNPRODUCTIVE TIME IN IDJJ FACILITIES WASTES SCARCE STATE RESOURCES.

To improve youth safety and youth outcomes, IDJJ needs to be able to maintain safe staffing ratios inside its facilities while simultaneously redirecting a portion of its current bricks, mortar, and monitoring budget toward the kind of in-facility and community-based treatment and programming that can help youth to thrive. This can only be accomplished by ensuring that rehabilitated youth are released without delay.

Large-scale prisons are inordinately expensive, unwieldy, and operationally-complicated places to house delinquent youth. Based on FY2015 general revenue appropriations and average daily population, the annual cost to incarcerate a young person is $131,335 in direct spending per capita (up to $186,496 after including other associated costs). Nearly all of the funds expended on youth incarceration are consumed by the cost of prison guards and infrastructure – not service and treatment programs that help youth rehabilitation. IDJJ continues to struggle to provide the basics (a full day of education, out-of-cell programming time, meaningful treatment) required by a recent consent decree resulting from a lawsuit alleging unconstitutional conditions of confinement.

Evidence-based programming delivered in a community setting is more effective than programming delivered in an institutional setting and comparatively inexpensive: two of the most effective therapies for delinquent youth, Functional Family Therapy (FFT) and Multi-Systemic Therapy (MST), cost $3,198–$7,280 for a year of treatment.

Fortunately, relatively small adjustments to length of stay, including improving the efficiency of the release approval process, can have a significant impact on IDJJ population. Completing transitions to aftercare as little as six weeks sooner could reduce IDJJ facility population by up to 20 percent.
RELEASE DELAYS MAY INCREASE YOUTH VICTIMIZATION AND RECIDIVISM.

Longer IDJJ Stays Do Not Optimize Safety. An effective juvenile justice system must create a culture that encourages youth to mature out of delinquent behavior, because most youth who commit even very serious crimes will soon cease offending as they grow up.23 Yet prison-like institutions, even when performing optimally and aimed at only the highest-risk youth, do not meet this requirement.24

The incarceration setting is at odds with basic functions of adolescent development25: static rules hinder teens’ ability to practice increasing judgment and independence; constant monitoring reduces development of personal responsibility and self-regulation; prescriptive behavioral norms interfere with emerging personal values. A complete hold is put on key social interactions, such as caring for younger children or navigating appropriate and respectful contact with opposite-sex peers. Parental guidance and support is mostly unavailable. Typical adolescent sleeping and eating schedules are impossible and may be further compromised by trauma or depression. Sibling relationships are interrupted. Positive school, family, and community supports are eroded.

Simultaneously, youth are placed in round-the-clock contact with high-risk youth, developing friendships they will be prohibited from continuing upon release. In the best-case scenario, it is difficult to imagine a more disconnected, isolating experience for a teenager. The typical scenario is much worse: crime, arrest, prosecution, and incarceration aggravate and compound existing youth trauma.26 Daily institutional life presents tangible risk of physical27 and sexual violence.28 The issues that brought youth into custody may remain unaddressed or be exacerbated by the setting, leading to extensions of incarceration, while mental health deteriorates.

While delinquent youth must be held accountable, it is important to do so in a manner that increases, not decreases, safety.29 Even short stays in detention facilities have deleterious effects on youth outcomes.30 Recent review of existing research by the National Academy of Sciences found no evidence that placement in a juvenile facility produces any public safety benefit after six months; rather, there is some evidence that longer stays increase recidivism for some youth.31 Therefore, responses to delinquency that include

While delinquent youth must be held accountable, it is important to do so in a manner that increases, not decreases, safety.
Rehabilitative Release

incarceration in a state facility must be carefully monitored to ensure that youth do not languish in facilities, increasing their risk of both victimization inside the institution and re-offense upon release.

Lengthy institutional stays are not a prerequisite to delivering evidence-based and evidence-informed services. As practitioners explain, “many of the most effective practices must take place in the home or community to build on a young person’s systems of support.”32 Although community-based programs are typically used as alternatives to incarceration,33 they can also facilitate timely, successful reentry, reducing unproductive length of stay inside a facility.34

**Average Length of IDJJ Stay Exceeds Any Recognized Public Safety Purpose.** Nationally, most youth held in state secure confinement have been there less than the recognized six-month cap on potentially positive institutional programming length, the “tipping” point at which risk of recidivism begins to increase for some youth.35 In Illinois, youth with a new delinquency petition stay on average 32 percent longer than this limit and parole violators stay 45 percent longer.36

**RECOMMENDATIONS FOR A REHABILITATIVE RELEASE PROCESS**

*Youth in IDJJ facilities should be able to access an attorney.* Incarcerated Illinois youth are nearly always unrepresented, with no access to counsel. Professional standards of juvenile defense recommend that attorneys continue representation of juvenile cases through final disposition.37 However, Illinois does not provide legal assistance to youth for any challenges to either the conditions or the length of their indeterminate commitment, an indeterminate period limited only by the maximum sentence length an adult could receive for the same crime or by reaching the age of 21.

*Revised release decision-making procedures should be transparent, consistent, and timely.* The release decision making mechanism must be consistent with the Juvenile Court Act’s balanced and restorative justice language,38 as well as the Act’s series of presumptions against incarceration in IDJJ prisons whenever less-restrictive means of supervision are available19 and full release eligibility as of the first day of entry into IDJJ custody.40 Most youth entering IDJJ at age 13-17 can be incarcerated until the age of 20 on a first commitment or 21 following a revocation of aftercare status.41 Illinois’ very
high ceiling on indeterminate youth commitments heightens the importance of best agency practices.

A system placing the release decision-making authority with IDJJ should include the following:

- Decisions about the suitability of youth for release should be made at regular intervals and according to written public guidelines;
- Youth denied release should be given written notification, legal representation, and the opportunity to be heard and present evidence to IDJJ;
- Hearings should be open to the youth’s family, attorney, or other advocates;
- IDJJ’s reasons for an adverse decision should be presented to the youth, and evidence presented by both sides should be recorded; and
- Youth should have the right to appeal the decision to a neutral arbiter.

CONCLUSION

The Illinois Juvenile Court Act should be aligned with national practice standards, enabling IDJJ to transition youth to community supervision using timely, responsible release procedures supported by due process protections. These reforms will optimize public safety, motivate youth, maintain family ties, hold IDJJ accountable for case planning, facilitate quality community programming, and reduce costly release delays that keep too many youth in prison for too much of their lives.

21 See, e.g., Illinois Department of Juvenile Justice, 2015 Annual Report, supra note 19 at 15 (“IDJJ has not yet met educational requirements for full-time, full-day schooling as outlined in the RJ Consent Decree and Remedial Plan at IYC-Kewanee or IYC-St. Charles. Ensuring special education students have the supports they need has also been a chronic challenge.”).
22 IJJC Reentry Report at 11.

24 NATIONAL ACADEMY OF SCIENCES, REFORMING JUVENILE JUSTICE: A DEVELOPMENTAL APPROACH 126 (Richard J. Bonnie, et al, eds.) (2013) “The practice of committing youth to large institutions that fail to provide for their developmental needs is both costly in financial terms and ineffective in furthering the goal of crime prevention.” Id.

25 “The process of changing an adolescent’s trajectory rests on the ability of the systems around the adolescent to support and direct the ongoing change process. In late adolescence, most individuals follow a pattern of individuating from parents, orienting toward peers, and integrating components of attitudes and behavior into an autonomous self-identity. These processes are occurring simultaneously in an overlapping fashion, with the success of one process dependent on the course of another. Navigating this developmental period successfully, in which the adolescent sees himself or herself as a prosocial, law-abiding person, requires supportive adults, healthy relationships with peers, and opportunities to make autonomous decisions.” Id. at 179 (internal citations omitted).

26 An estimated 75% - 93% of youth entering the juvenile justice system have experienced some degree of trauma. JUSTICE POLICY INSTITUTE, Healing Invisible Wounds: Why Investing in Trauma-Informed Care for Children Makes Sense (Washington, DC: Justice Policy Institute, 2010).

27 “Less than 17 percent of youth in placement for a year or less experienced some form of violence, compared with 24 percent of youth in placement between 18 and 24 months, and 33 percent of those in placement for more than 2 years.” Melissa Sickmund and Charles Puzzanchera, NATIONAL CENTER ON JUVENILE JUSTICE, Juvenile Offenders and Victims: 2014 National Report (2014).

29 “In short, the experience of imprisonment is more aversive for adolescents than for adult prisoners, because adolescents are in a formative developmental stage in which their social context is likely to shape the trajectory of their future lives. While some may view this experience as one that is deserved due to the harm caused to any victim of crime, it does not accomplish the purpose that most victims desire for a juvenile offender, i.e., that the result of incarceration will be no future victims.” Id. at 135.

30 For example, Cook County youth who were sent to juvenile detention were twice as likely (as youth with the same backgrounds who were not detained due to more lenient judges) to be incarcerated in an adult prison by the age of 25. Anna Aizer, Joseph J. Doyle, Jr., Juvenile Incarceration, Human Capital and Future Crime: Evidence from Randomly-Assigned Judges, NBER Working Paper No. 19102 (June 2013). See also

EXECUTIVE SUMMARY
YOUTH REENTRY IMPROVEMENT REPORT
ILLINOIS JUVENILE JUSTICE COMMISSION
NOVEMBER 2011
I. EXECUTIVE SUMMARY

Introduction

An essential measurement of any juvenile “reentry” system is whether youth returning from incarceration remain safely and successfully within their communities. By this fundamental measure, Illinois is failing.

While precise data is difficult to come by (itself an indication of our current reentry shortcomings), it is clear that well over 50 percent of youth leaving Department of Juvenile Justice (“DJJ”) facilities will be reincarcerated in juvenile facilities; many others will be incarcerated in the adult Department of Corrections (“DOC”) in the future. The costs of failure are catastrophic for the young people in the state’s care, for their families, and for our communities. The financial costs of this failing system are staggering as well: The Illinois Auditor General estimates that incarceration in a DJJ “Youth Center” cost $86,861 per year, per youth in FY10. Worse, the juvenile justice system is, in many ways, the “feeder system” to the adult criminal justice system and a cycle of crime, victimization and incarceration. Today, nearly 50,000 people are incarcerated in Illinois prisons at an immediate annual cost to the state of well over $1 billion. The economic ripple effect of incarceration inflates taxpayer costs even more. In human terms, we must do better for our young people and our communities. In fiscal terms, we simply cannot afford to continue business as usual.

There is good news: Young people are capable of tremendous positive change and growth and—with the right support, supervision and services—youth leaving DJJ facilities can become valued assets in our communities. In addition, there is burgeoning knowledge in Illinois and beyond about adolescent brain development, effective community-based supervision and services, and “what works” with young offenders. Perhaps most importantly, there is growing leadership and commitment in Illinois to do what is necessary to ensure that young people leaving the state’s custody return home safely and successfully. This report provides the findings and recommendations of the Illinois Juvenile Justice Commission, as required by the Youth Reentry and Improvement Law of 2009, 20 ILCS 505/17a-5(1), to realize this vision of safe communities, positive outcomes for our youth, and responsible use of public resources.

The Illinois Juvenile Justice System

Illinois has long been a pioneer in juvenile justice, creating the first juvenile court in the United States in 1899. Proponents of the original juvenile court understood that the moral culpability of youth is significantly different from that of adults, necessitating a distinct juvenile justice system. Today, we also understand that youth are biologically different from

“An essential measurement of any juvenile “reentry” system is whether youth returning from incarceration remain safely and successfully within their communities. By this fundamental measure, Illinois is failing.”

“Human terms, we must do better for our young people and our communities. In fiscal terms, we simply cannot afford to continue business as usual.”
“Simply put, the drawbacks of relying upon a flawed surveillance-only punishment strategy for youth on parole are clear: unacceptably high reincarceration rates for youth with no corresponding fiscal or safety benefit to the public.”

As a State, we recognize the potential for youth to “avoid delinquent futures and become productive, fulfilled citizens.” The Illinois Juvenile Court Act states: “It is the intent of the General Legislature to promote a juvenile justice system . . . which equip[s] juvenile offenders with competencies to live responsibly and productively . . . and enables a minor to mature into a productive member of society.”

There are many differences between the juvenile and adult judicial systems. One key difference for the purpose of this report is the sentencing of juveniles. Most citizens are familiar with the adult system, where a judge sentences an offender to a finite prison sentence. When a judge decides to send a juvenile to serve a sentence in the Illinois Department of Juvenile Justice, however, that sentence is indeterminate, or open-ended. Juveniles can only be released from DJJ by reaching the age of 21 or by a decision of the Prisoner Review Board. (See Section III. A. for additional details.)

In 2006, Illinois, in further recognition of the unique needs of youth and the differences between the juvenile and adult systems, established the Department of Juvenile Justice, independent of the Department of Corrections. The dual mission of the Department of Juvenile Justice is to hold juvenile offenders accountable for illegal conduct and to rehabilitate youth to become productive members of the community.

In spite of the separation of DJJ from DOC and numerous federal and Illinois laws recognizing the inherent differences between youth and adults, the reality for Illinois youth is that once they are committed to the Department of Juvenile Justice, they are subject to a system of release decision-making, parole, and revocation that is functionally identical to the adult system and modeled on adult culpability and capability. The application of these adult approaches to youth is problematic—not just for developmental and fundamental fairness reasons, but because it does not work. Simply put, the drawbacks of relying upon a flawed surveillance-only punishment strategy for youth on parole are clear: unacceptably high reincarceration rates for youth with no corresponding fiscal or safety benefit to the public.

Basic facts about the Illinois juvenile justice system support this conclusion. Recently released population data from the Illinois Department of Juvenile Justice reveals that in seven out of the past eight years, technical parole violators—whose noncompliant behavior, for example, was failing to obey house rules, were unemployed, failed to obey house rules, etc.) represented a greater percentage of the incarcerated juvenile population than any other type of admission, whereas youth who committed a new offense while on parole comprised only 2 percent of the average DJJ population. In fact, on any given day, approximately 40 percent of incarcerated youth are technical parole violators. The large number of incarcerated juvenile technical parole violators—whose noncompliant behavior...
tor likely poses no threat to public safety—overextends DJJ resources and significantly undermines DJJ’s ability to provide necessary programs for high risk and high need youth.

The Illinois Auditor General estimated that in FY 10 it cost the State of Illinois $86,861 to incarcerate one youth for a year.13 By contrast, more effective community-based strategies cost far less; examples include Functional Family Therapy, which costs $3,198–$3,309 per year, and Multisystemic Therapy, which costs $7,206–$7,280—a savings of at least $79,581, per youth per year.14 Improved reentry strategies that reduce reincarceration for technical violations are therefore critical to the fiscal health of Illinois.

Over the course of this study, the Commission has noted that there are many highly-qualified, caring professionals working at all stages of the juvenile justice system. However, this report highlights the ways in which the system is structurally flawed and that, rather than supporting the qualified professionals who strive for positive youth outcomes and public safety, the current juvenile justice system impedes and contradicts their efforts.

Commission’s Youth Reentry Improvement Analysis and Policy Recommendations

Under the Youth Reentry and Improvement Law of 2009, the Illinois Juvenile Justice Commission (“Commission”) was charged with developing recommendations to ensure the effective reintegration of youth offenders into the community.15

15. In addition to policy recommendations, the law directed the Commission to provide the following information on youth whose parole was revoked:

- the number of youth confined in the Department of Juvenile Justice for revocation based on a technical parole violation,
- the length of time the youth spent on parole prior to the revocation,
- the nature of the committing offense that served as the basis for the original commitment,
- demographic information including age, race, sex, and zip code of the underlying offense, and
- the conduct leading to revocation.

The statutorily mandated data is attached as Appendix A.

The Commission reentry study represents a significant undertaking, in which the Commission amassed an unprecedented amount of data and insight into the juvenile reentry and revocation system. Specifically, the Commission:

- reviewed nearly 400 files of youth whose parole was revoked;
- observed over 230 Prisoner Review Board (“PRB”) juvenile hearings;
- met with DJJ, DOC, Department of Children and Family Services (“DCFS”), and PRB staff multiple times over the course of the study and analysis;
- reviewed Illinois’ and other states’ statutes, case law, rules, policies, and procedures regarding juvenile sentencing, release, parole, and revocation; and
- researched best practices regarding juvenile release decision-making, reentry, and revocation.

In this report, the Commission presents its findings on the current systemic failures of the Illinois juvenile justice reentry system, highlights of which are summarized below:

- The current release decision making process for youth undermines the rehabilitation and public safety goals of the Illinois juvenile justice system in that:
  - release is largely dictated by a youth’s committing offense and alleged disciplinary violations while incarcerated, instead of by an informed, objective determination that it is in the best interest of the youth and the public for the youth to be released;
  - no independent review mechanism assesses or documents the youth’s rehabilitative progress and the appropriateness of continued incarceration; and
  - conditions of parole restricting movement, prohibiting activities, and mandating programs or services are established without evidence or meaningful basis and without support to encourage their completion.

“The current release decision making process for youth undermines the rehabilitation and public safety goals of the Illinois juvenile justice system. . .”
• Youths’ constitutional due process protections are violated by the basic structure and process of Prisoner Review Board revocation proceedings in that:
  o youth are not informed of their right to request counsel at revocation hearings;
  o youth are denied the opportunity to present and review evidence;
  o youth are denied the ability to cross-examine adverse witnesses;
  o revocation determinations are idiosyncratic, subjective, premised on a cursory review of documents, void of guidelines, and not reviewable; and
  o PRB members fail to explain the purpose of the hearing to the youth or provide the youth with a substantive written explanation of the decision.

• The current parole system, which is operated by the Department of Corrections’ adult parole division, is costly and ineffective at sustaining pro-social youth behavior, enhancing public safety, and reducing recidivism, in that:
  o parole agents supervise mixed caseloads of both adults and juveniles\(^\text{16}\) and are unable to use specialized youth reentry strategies;
  o parole agents do not effectively link youth to state-mandated or essential services; yet

\(^{16}\) In Region 1, parole officers do have juvenile-only caseloads. However, these officers do not have adequate juvenile-specific training, specialized resources, or strategies at their disposal to supervise and support youth any more effectively than their counterparts who supervise blended adult/juvenile caseloads.

Based on the Commission’s extensive research and findings, this report presents recommendations for reform that will promote the effective reintegration of youth offenders into the community while ensuring youths’ constitutional due process protections.

• The Department of Juvenile Justice youth tracking software is antiquated and fails to effectively manage youth assessments, programming progress, and public safety monitoring.

• The Department of Juvenile Justice must prepare youth for timely release and qualified members of the Prisoner Review Board must increase the frequency and quality of release hearings.

• The current Department of Corrections adult parole surveillance model for juveniles should be replaced by a statewide extension of DJJ’s Aftercare Specialist pilot program.

• A court must make parole revocation determinations; Prisoner Review Board revocation hearings do not afford youth constitutional due process protections.

• The Department of Juvenile Justice must develop and implement an integrated case management system to facilitate necessary information sharing, which will allow effective youth case planning and monitoring.

“The current parole system, which is operated by the Department of Corrections’ adult parole division, is costly and ineffective at sustaining pro-social youth behavior, enhancing public safety, and reducing recidivism. . .”

“Youths’ constitutional due process protections are violated by the basic structure and process of Prisoner Review Board revocation proceedings. . .”
APPENDIX B

JUVENILE STATE SECURE CARE RELEASE MECHANISMS
50-STATE SURVEY

The custodial department makes release decisions in 32 states:

Alabama        Hawaii        Mississippi
Alaska          Idaho         Missouri
Arizona         Indiana       Montana
Arkansas        Kansas        Nebraska
Connecticut     Kentucky      Nevada
Delaware        Maine         New Mexico
Florida         Massachusetts New York
Georgia         Minnesota     North Carolina

Juvenile court makes release decisions in 9 states:

Iowa            Michigan      Rhode Island
Louisiana       Ohio          South Dakota
Maryland        Pennsylvania Vermont

A juvenile-specific parole authority makes release decisions in 8 states:

California      New Jersey    Utah
Colorado        Oklahoma      Wisconsin
New Hampshire    South Carolina

A non-juvenile-specific parole authority makes release decisions in 1 state:

Illinois
